- GT Performance[®] 20W-50
- GT Performance[®] Racing
- HD Single Grade
- High Mileage
- Synthetic Blend Motor Oil
- Synthetic Motor Oil

How do you drive? Remember, we're talking Real World here. Lots of short trips and stop & go driving? Pennzoil[®] Motor Oil with PureBase[®] is a more robust motor oil to withstand the kind of contaminants created in your engine when traffic (or habit) makes you drive like that.

Check your odometer – got over 75,000 miles? Try Pennzoil[®] Higher Mileage Vehicle[™] Motor Oil that helps protect worn parts and prevents leaks in older, wiser vehicles.

Maybe you haul heavy loads for your job, or just pack lots of gear for the kids' soccer team? Pennzoil[®] Synthetic Blend is your best bet – it's got a thicker film cushion which won't shear down as much as an ordinary conventional motor oil when your engine's bearings are working harder to carry more weight.

Do you drive in extreme conditions or just want to have the most comprehensive protection no matter what kind of driving you face? You've got to go with Pennzoil[®] Synthetic Motor Oil. Most notably it keeps flowing in extreme weather conditions, but there's a lot more to it than that. It's formulated to be the premier motor oil and it meets the requirements of advanced engines.

If you've got a diesel engine you're protecting, use Pennzoil[®] Long-Life[®] Heavy Duty Engine Oil. Long-Life[®] is formulated with PureBase[®] and Pennzoil's unique Long-Life[®] additive system that provides a shield against all forms of wear to help extend engine life, reduce oil consumption and provide consistent oil pressure for thorough engine lubrication.
